The status of the claims is as follows:

Claims 1-9 are herein addressed below.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, line 1, it is not readily apparent to the Examiner if the applicant is claiming a functional unit or a functional unit in combination with a door. Throughout the claims, the applicant clearly and positively recites the door. If the applicant intends on claiming the combination then the applicant must clearly and positively set forth the door in the preamble.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

As best understood, claims 1-4 and 8 are further rejected under 35 U.S.C. 102(b) as being anticipated by Waltz et al. (5,902,004). Waltz et al. (5,902,004) disclose a functional unit (3) in combination with a vehicle door (1) comprising a lock assembly (32, 33, and 6) connected to a motor (38) which drives a window pane (100) between an open and closed position within the vehicle door (1), a coupling means (900, 61, and 39, see figure 1) to selectively actuate the door lock assembly (32, 33, and 6) via the motor

(38), and a handle (inside 6, outside 8) connected to the coupling means to engage and disengage the lock assembly to a strike plate (111).

Depending on the applicant's amendments, claims 5-7, and 9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The applicant's arguments have been considered but are not deemed to be persuasive. The applicant states that in claim 1, just the functional unit is being claimed and the door is not relevant. This argument is confusing at best. If the applicant intends on claiming just the "functional unit", then only the "functional unit" need be in the preamble, yet the applicant continues to state that the functional unit is "for a door" but still positively recites the door in the body of the claims.

Furthermore, the applicant stated that if the language was changed, then the claims would read over Waltz et al. The Examiner respectively disagrees. The Examiner was merely pointing out that the applicant was relying on language within the claims to read over Waltz et al. and the Examiner was pointing out that the applicant's arguments are more limiting than that of the claims because the applicant had failed to positively recite elements which were relied upon to read over Waltz et al. Waltz et al. still reads on the claims.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
